

**Wave Air Conditioning**

*Our first pitch-side advertising board can now be seen just behind the goal at the Coca-Cola League One football ground of AFC Bournemouth.*

*The choice of club has absolutely nothing to do with the fact that our managing director is a life-long Bournemouth fan.*

## New Fujitsu price list

The new Fujitsu price list is now available. If you would like a copy, call your local Wave office, or find it in pdf form on our web site.

## Fujitsu price drops

In the new Fujitsu price list, the prices for inverter driven equipment have been cut, in some cases below the price of a single speed unit.

## New arrival

LG R410a two and three-pipe multi V VRF systems are now available from Wave, as well as a full range of indoor units, including the ever-popular Art Cool series.

## Wave web site is the place for brochures

If we sell it, the brochure for it will be on our web site at [www.wave-ac.co.uk](http://www.wave-ac.co.uk)

Contact us at: Basingstoke office 01256 403000  
West Midlands office 01922 455111

## Reward yourself with AIR - Amazing Installer Rewards

Every time an installer buys Fujitsu air conditioning equipment, he will receive points, redeemable against a range of hundreds of gifts, including 22 High Street retailer vouchers.

If you want to know more, visit [www.fujitsu-general.co.uk/air](http://www.fujitsu-general.co.uk/air)

## Panasonic inverters for all

An R410a inverter option is now available on all types of Panasonic indoor units, and the very economical cooling only and heat pump fixed speed units have also been introduced.

This news comes at the same time as Panasonic has opened a new pan-European stocking facility in Germany, which should cure the company's stocking problems for all Daikin-built products.

*We took the name Wave literally with our choice of hospitality events during Cowes Week in August. We hope all our customers who took part enjoyed the yachting and, as in our picture, the exciting RIB rides.*

## Wave Air Conditioning

### Almost as good as a closed door

As the heating season approaches, remember, as well as air conditioning, we also carry the full range of Thermoscreens air curtains. The units are designed to be mounted above doorways that have to be opened and shut frequently.

Thermoscreens produces a range of heated, ambient and cold store air curtains designed to keep the inside isolated from the outside; keeping the inside cool, cold or warm, as required, and keeping out ambient heat or cold, insects, dust and fumes.

Call us for a brochure and more information.

### LG training course

If you or your staff need training on LG VRF or splits, training dates are now available from us for sales, application and installation courses. These will all take places at LG's new £1m training suite in Slough.

Contact us for more details or to book a place.

Contact us at: Basingstoke office 01256 403000  
West Midlands office 01922 455111

### Wave strengthens the team

Julian Parsons has rejoined his former colleagues by becoming the latest member of the Wave Air Conditioning team. He is our new regional sales manager for east London and Kent.

Julian started his 10 years in the industry at NRS, where he worked with most of the current Wave team. He has since worked in positions of increasing responsibility for Williams Environmental, Mitsubishi Direct and McQuay UK. He will be based in the field and at the Wave head office.

Says Julian: "I am really looking forward to joining the team again, we have already worked very well together. I believe I can bring a great deal of energy to the job and my time with other companies means I will bring a different experience set to the organisation."

*The people in our sister company, Wave Heat Recovery, are so keen on their energy saving Lifebreath equipment that they sometimes get carried away. Mark Lister here was so excited that he just didn't see that door coming.*

**See our accessory price list on our web site for such things as brackets, pumps, copper and much more. All from leading UK suppliers.**
